## **NON-FINAL OFFICIAL ACTION**

### ***Status of the Claims***

Claims 1, 14, 29 and 36 are rejected under 35 USC §101, Statutory Double Patenting.

Claims 14 and 36 are rejected under 35 USC §112, fourth paragraph.

Claim 26 is objected as a substantial duplicate.

Claims 2-13, 15-25, 27, 28, 30-35, 37 and 38 are objected to while containing allowable matter.

### ***Rejections under 35 USC §101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1, 14, 29 and 36 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 8 and 36 of prior application 09/424,667 (issue fee paid) awaiting U.S. Patent Number. This is a double patenting rejection.

The prior patented claims 8 and 36 awaiting printing recite the features of storing a program in a ROM. When combined with their respective independent claims, this claimed subject matter is identical to pending claims 1, 14, 29 and 36.

Applicant is further advised, that in attempting to correct this coverage overlap, that a Non-Statutory Double Patenting rejections will likely result, and as such Applicant is strongly encouraged to file a Terminal Disclaimer with the amendments to correct the Statutory Double Patenting Rejections.

***Rejections under 35 USC §112, second paragraph***

35 U.S.C. 112, fourth paragraph reads as follows:

Subject to the following paragraph, a claim in dependent form shall contain a reference to a claim previously set forth and then specify a further limitation of the subject matter claimed. A claim in dependent form shall be construed to incorporate by reference all the limitations of the claim to which it refers.

Claims 14 and 36 are rejected under 35 USC §112, fourth paragraph. These claims contain limitations identical to those found in the base independent claims.

***Duplicate Claim Objections***

Claim 26 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 19. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

***Allowable Subject Matter***

Claims 2-13, 15-25, 27, 28, 30-35, 37 and 38 contain subject matter which has been indicated allowable in the prosecution of US Patent Application 09/424,667.
